NBN Co COVID-19 Relief Package

\$50 million
for connecting low-income families with school children

Support for low income households to assist with home schooling

nbn will waive its \$37 monthly wholesale charge for internet providers for many services on the 25/5Mbps speed tier between April and September 2020, to support low-income households with school-aged children who do not currently have an active nbn connection at home. This is intended to enable internet providers to create more affordable offers to connect these families as Term Two of school starts across the nation.

\$50 million
for small and medium businesses, emergency and essential services

Support for residential, and small and medium business customers

Funds will also be allocated help residential, and small and medium business customers who are struggling to pay their monthly bill to stay connected during this period of uncertainty. Small and medium businesses will also be able to receive discounted access to new connections of specified wholesale business grade products to help them to maintain or re-establish their businesses once this crisis passes.

\$50 million
for residential customers facing financial hardships

Support for emergency and essential services

The fund aims to build resilience for essential and emergency services, and telehealth providers as online demand for these services grows. This includes providing higher speeds for telehealth providers, enhanced service levels, and prioritised connections and fault resolution through this period of increased demand. A key feature will enable health providers, such as GP clinics, that have basic or standard **nbn** services to upgrade to eligible higher speed tiers at no additional charge to assist with telehealth needs.

Supporting Australia is our priority
NBN Co creates **\$150 million** COVID-19 relief and assistance package

More information

nbn's \$150 million relief and assistance package will be made available to internet providers in accordance with applicable terms and conditions from April to 30 September 2020, but it's a matter for retailers to determine when and what offers they develop for their customers.

Constituents who wish to access support outlined in this package should speak with their internet provider about what support is available to them.
