Reporting questionnaire

Gender equality indicator 1: Gender composition of workforce

This indicator seeks information about the gender composition of relevant employers in a standardised format, to enable the aggregation of data across and within industries. The aggregated data in your workplace profile assists relevant employers in understanding the characteristics of their workforce, including in relation to occupational segregation, the position of women and men in management within their industry or sector, and patterns of potentially insecure employment.

NB. IMPORTANT:

- References to the Act mean the Workplace Gender Equality Act 2012.
- A formal 'policy' and/or 'formal strategy' in this questionnaire refers to formal policies and/or strategies that are either standalone or contained within another formal policy/formal strategy.
- Data provided in this reporting questionnaire covers the TOTAL reporting period from 1 April 2019 to 31 March 2020. (This differs from the workplace profile data which is taken at a point-in-time during the reporting period).
- Answers need to reflect ALL organisations covered in this report.
- If you select "NO, Insufficient resources/expertise" to any option, this may cover human or financial resources.

Gender equality indicator 2: Gender composition of governing bodies

Gender composition of governing bodies is an indicator of gender equality at the highest level of organisational leadership and decision-making. It can mean the board of directors, trustees, committee of management, council or other governing authority of the employer.

- 2. The organisation(s) you are reporting on will have a governing body. 4.01 You may provide details below on the type of gender remuneration gap analysis that has been undertaken (for example like-for-like and/or organisation-wide).

Using the WGEA tool, we completed a gender pay gap analysis comparing like for like positions, and found the majority of our workplace fits within the "professional, non-manager" category. However, we found this classification does not account for the complexity and diversity of skills, qualifications and experience required to perform different professional roles across the organisation, and could not find any unacceptable/unexplained gender base remuneration gaps throughout the organisation. Similarly the WGEA manager classifications incorporate a cross section of differing management levels across the organisation (including varying levels of responsibility and portfolios) and we did not find any unacceptable/unexplained gender base remuneration gaps.
